

REACH Compliance

Dear Valued Customer,

REACH is a European Union (EU) initiative also known as EC Directive No. 1907/2006. This directive requires that companies register chemical substances in products being shipped into the EU.

Article 7 (Registration and Notification of Substances in Articles) states the following:

"1. Any producer or importer of articles shall submit a registration to the Agency for any substance contained in those articles, if both of the following condition are met:

- (a) The substance is present in those articles in quantities totaling over 1 ton per producer or importer per year.
- (b) The substance is intended to be released under normal or reasonable foreseeable conditions of use."

Based on the above statement from the Directive, we have concluded that we are exempt from registering, as the substances (chemicals) contained in our product are not intended to be released to the environment under any conditions.

XMA Corporation-Omni Spectra®, does not use any Substance of any High Concern (SVHC's) in our manufacturing processes as identified in the December 17, 2014 update

XMA Corporation-Omni Spectra®, does require on all our purchase orders to our vendors that we be notified immediately of any SVHC Content is present and as of yet no SVHC's have been indentified and/or communicated.

XMA Corporation-Omni Spectra®, conducts its business as a model corporate citizen. We are dedicated to the broader community and to act responsibly to help protect our environment, provide economic opportunity fairly, work safely, and consider the person in all of our business affairs.

Thank you for supporting both our business and the environment.

Best Regards.

Marc E. Smith
