- Mechanically Robust

## ABOUT THIS PRODUCT

XMA's brand new SMP thread-in is a robust product ready for your next high density cryogenic application. This product mounts directly to your chill plate and is excellent in thermally anchoring your RF line. The SMP thread-in is offered in all standard dB values and runs from DC-18GHz. Manufactured with gold-plated beryllium copper housings, this brand new product is tough and able to mate and de-mate numerous times. Contact us for additional information!
