ABOUT THIS PRODUCT

XMA's swept 90s are the ideal mechanical solution for your system's needs. They gently transition your signal in a 90 degree angle without interrupting the RF path. XMA's Swept 90s have SMA connectors and go from DC to 18 or 26GHz, depending on your application needs. This product has a stainless steel outer conductor and is ideal for your telecom or test and measurement needs. Visit our website or call today for more info!
