

# 50GHZ CRYO LINE

SERVING THE QUANTUM COMPUTING MARKET, ONE CONNECTION AT A TIME

## QUICK FACTS

- Servicing DC-50GHz
- Success down to 10mK
- Industry leading VSWR
- 2.4mm connectors
- Superior thermal anchoring

## ABOUT THIS PRODUCT

XMA's new high frequency cryogenic attenuator is the perfect solution for your quantum computer, telescope, or other scientific application. These DC-50GHz attenuators have proven success down to 10mK and have gone through extensive testing. With industry leading VSWR, these attenuators are the best way to manipulate your incoming signal. They use 2.4mm connectors and have a superior launch pad for thermal grounding. Inquire today to get your hands on this brand new product!
