

# WATT'S HAPPENING

## Space Qualified Components

*Serving the Space Market*

- Attenuators, Couplers, Power Dividers, DC Blocks, Terminations
- In House RF and Electrical Test Capabilities
- Successful Space Legacy
- DC-65 GHz Products

XMA's TVAC products include attenuators, directional couplers, power divider, DC blocks, terminations, and specialized adapters. These products have successfully driven a multitude of space missions and ensured scientific accuracy and personal safety during flight and orbit. Our products have contributed to a league of scientific efforts, including the discovery of exoplanets and weather forecasting. XMA has invested in multiple test apparatuses to ensure our products are ready for your next mission. Our products come in a variety of connectors ranging from DC-65 GHz. Check out our website for more information or give us a call!
